

Product information

Booster Valve Treat

Booster Valve Treat is a high performance additive that damps down the noise generation of hydraulic valve lifters

APPLICATION

Booster Valve Treat releases and lubricates sticking valve stems and hydraulic valve lifters. Cleans engine deposits in the oil system. Recommended for all petrol and diesel engines with or without turbochargers. Compatible with mineral and synthetic engine oils. Safe for use with catalytic converters.

PROPERTIES

- Dissolves dirt, gum and varnish deposits in the oil system
- Releases and lubricates sticking valve stems and hydraulic valve lifters
- Restores lost power
- Restores efficient working of hydraulic valve lifters
- Reduces valve train noise

TYPICALS

Colour	Brown
Physical State at 20°C	Liquid
Density at 15°C g/ml	0,890
Flash Point °C	100

INSTRUCTIONS FOR USE

Pour the contents of one bottle into the engine oil carter when the engine is warm, then operate vehicle normally.

One bottle treats a crankcase of 3 to 6 litres.

CAUTION

Before use, read carefully safety instructions on packaging or on safety data sheet.
